Health and Safety

It is important that drivers of work vehicles are fully protected from harmful vibrations. KAB seats can eliminate up to 70% of these. Careful seat selection is important and through consultation with KAB Seating's network of Authorised distributors the appropriate choice can be made.

Installation

Care should be taken to ensure a correct installation is made and the seat suspension movements and adjustments are free from obstructions in the cab area.

Maintenance

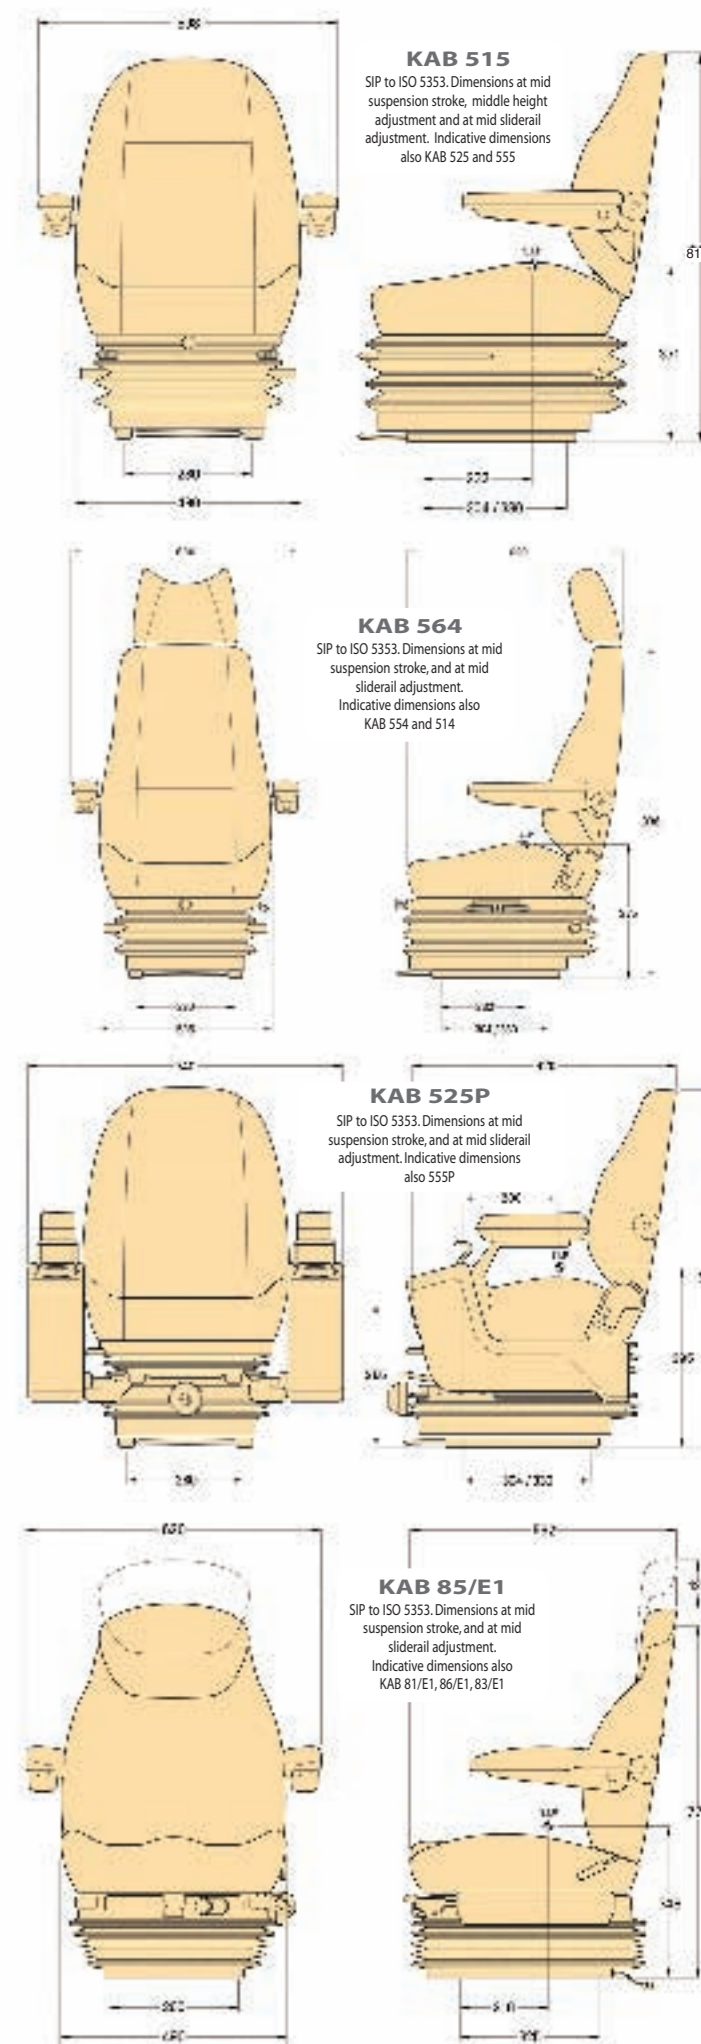

KAB Seating provides a full range of service parts to ensure seats can be maintained properly, key wear items such as shock absorbers, seat cushions and air valves should be replaced on a regular basis in accordance with the type of usage, amount of usage and environmental factors. Regular removal of dust and dirt from the seat and cabin will improve the longevity of the seat.

Product Maintenance

KAB Seating offers a full range of replacement parts.

Construction and Mining Seating

The KAB Seating range of air and mechanical suspension seats are suitable for:

-  Medium/large wheel loaders
-  Small wheel loaders
-  Small/medium backhoes
-  Large backhoes
-  Articulated/rigid dump trucks
-  Large excavators/opencast mining machines/dredgers
-  Bull dozers
-  Small/medium excavators
-  Mobile cranes
-  Telescopic handlers
-  Underground mining machines
-  Forestry machines

For construction vehicles and machinery with good overhead cabin space, KAB seats with 100-165mm suspension stroke are available to protect drivers from harmful vibrations. Our seats from the 100/400/500 and 800 series are in this category.

For small construction and work vehicles with limited cab space, KAB seats with restricted suspension stroke of 50-80mm and thinline seat cushions may provide better installation solutions. The KAB 200 series in particular is appropriate, however reduced stroke 100,400 and 700 series are also available.
